

March 23rd, 2020

Our patients' safety is our #1 priority.

In order to reduce patient exposure to COVID-19, our practice is taking the following measures:

We are conducting screenings FOR SYMPTOMS for every individual (employees included) that walk in the office.

No one under the age of 12 is permitted in the office.

Visitors are discouraged unless the patient requires assistance with language, mobility or for cognitive reasons.

We are directing symptomatic patients to be tested for COVID-19 BEFORE coming to our office.

Our office is located outside of the hospitals, thereby reducing our patients' chances of infection.

We are happy to see new cardiology consults and will get them seen quickly and safely.

We are open during normal business hours, on call 24/7, following CDC guidelines, and now using TELEHEALTH (please contact our office to utilize this new feature.)

Thank you for your cooperation and understanding during this time. Please contact our office if you have any additional questions.
